

**EE : ELECTRICAL ENGINEERING****Power Systems****INDEX**

Sr. No.	Contents	Sub-Topics	Pg. No.
<b>1. Generation &amp; Load Characteristics</b>			
	Notes	Introduction	1
		Thermal Power Station	1
		Types Of Turbines Used In Steam Power Plant	2
		Hydro Electric Stations	3
		Classification Of Hydro Power Plants	4
		Comparison Of Kaplan And Francis Turbine	5
		Characteristics Of Turbines	5
		Nuclear Power Station	5
		Diesel Power Station	7
		Comparison Of Various Power Stations	10
		Load Curves and other Relative Factors	10
		LMR(Last Minute Revision)	12
	Assignment-1	Questions	13
	Test Paper-1	Questions	14
<b>2. Transmission Line Parameters</b>			
	Notes	Introduction	16
		Resistance	16
		Inductance of a conductor	17
		Inductance of a Single Phase Two Wire Lines	20
		Flux Linkages of Conductor in a Group	20
		Inductance of composite Conductor Lines	21
		Bundle Conductors	25
		Inductance of double circuit Three Phase Line	25
		Electric Field of long Straight Line	26

Sr. No.	Contents	Sub-Topics	Pg. No.
		Capacitance Of Two Wire Line	27
		Capacitance Of Three Phase Line With Symmetrical Spacing	28
		Capacitance Of Three Phase Line With Asymmetrical Spacing	29
		Capacitance Of Bundled Conductor Lines	30
		Capacitance Of Double Circuit 3 – $\phi$ Line	31
		Effect Of Ground On Line Capacitance	33
		Per Unit Method	35
		One Line Diagram	36
		Impedance and Reactance Diagram	37
		Classification of Transmission Lines	37
		Short Transmission Lines	38
		Medium Transmission Lines	39
		Long Transmission Lines	41
		Ferranti effect	42
		Surge Impedance Loading	43
		LMR (Last Minute Revision)	43
	Assignment–2	Questions	44
	Test Paper–2	Questions	46
<b>3. Supply System, Overhead Lines, Corona, Cables</b>			
	Notes	<b>Supply System</b>	
		Introduction	49
		Different System of Transmission and Circuits	49
		<b>Overhead Lines</b>	
		Conductors	55
		Line Supports	55
		Line Insulators	56
		String Efficiency	58
		Vibration of Conductors	61
		Spacing of Conductors	62
		Sag and Tension Calculation	63
		<b>Corona</b>	
		Introduction	66
		Factors Affecting Corona	67
		Some Terms Related to Corona	67
		Effects of Corona	69

Sr. No.	Contents	Sub-Topics	Pg. No.
		<b>Underground Cables</b>	
		Introduction	69
		Types of Cables	69
		Insulating Materials for Cables	69
		Construction of Cable	70
		Effective Conductor Resistance	70
		Dielectric Stress	72
		Grading of Cable	73
		LMR (Last Minute Revision)	77
	Assignment-3	Questions	78
	Test Paper-3	Questions	79
<b>4. Load flow Studies and Fault Analysis</b>			
	Notes	<b>Load flow Studies</b>	
		Introduction	81
		Bus Admittance / Bus Impedance Matrix	81
		Load Flow equation	83
		Approximate Load Flow Study	84
		Advantages & Disadvantages of GS and NR Method	85
		<b>Faults Analysis</b>	
		Balanced & Unbalanced faults	85
		Symmetrical Faults	85
		Short circuit Capacity (SCC)	86
		Procedure for Calculating S.C. Voltmages and S.C. current	87
		Short Circuit MVA in Tie Bus System	87
		Symmetrical Components	89
		Power in terms of Symmetrical Components	91
		Potential of Neutral	92
		Sequence Impedance representation	93
		Unsymmetrical Faults	96
		Balanced 3 – $\phi$ Faults	101
		Comparison of Single Line to ground & 3 – $\phi$ fault currents	102
		LMR (Last Minute Revision)	103
	Assignment-4	Questions	104
	Test Paper – 4	Questions	106

Sr. No.	Contents	Sub-Topics	Pg. No.
<b>5. Stability, Grounding, Voltage Control &amp; Pf improvement</b>			
	Notes	<b>Stability</b>	
		Stable and Unstable Systems	109
		Power Angle Curve	109
		Steady State Stability Criterion	111
		Swing Equation	111
		Swing Curves	112
		Inertia Constant	112
		Equivalent System	113
		Equivalent M constants of Two Machine	113
		Equal Area Criterion	114
		<b>Grounding</b>	
		Introduction	115
		Arcing Ground	115
		Method of Neutral Grounding	116
		Step Potential, Touch Potential & Transferred Potential	119
		<b>Voltage Constant</b>	
		Introduction	120
		Methods of Voltage Control	120
		<b>Power Factor Improvement</b>	
		Introduction	122
		Causes of Low Power Factor	122
		Power Factor Improvement	123
LMR (Last Minute Revision)	126		
Assignment-5	Questions	128	
Test Paper-5	Questions	129	
<b>6. Relays, Circuit Breakers and HVDC</b>			
	Notes	Introduction	131
		Basic Protection Scheme	131
		Protective Relays	132
		Electromagnetic Relays	132
		Protection of Generators	146
		Protection of Transformers	147
		Protection of Lines	147
		Static Relays	148
		Circuit Breakers	151
		Testing of Circuit Breakers	153
		Types of Circuit Breaker	154
		Circuit Breaker Rating	156

		<b>High Voltage Direct Current (HVDC) Transmission</b>	
		Introduction	157
		Classification of HVDC Systems	157
		Economic Comparision	158
		Advantages of HVDC Transmission	161
		Components of HVDC transmission System	161
		Filters	161
		Limitations of HVDC Transmission	162
		Application of HVDC Transmission	162
		LMR (Last Minute Revision)	162
	Assignment–6	Questions	164
	Test Paper–6	Questions	166
<b>Practice Problems</b>			<b>168</b>
<b>Model Solutions</b>			
		Answer Key to Assignments	181
		Model Solutions to Assignment – 4	182
		Model Solutions to Assignment – 6	182
		Answer Key to Test Paper	183
		Model Solutions to Test Paper – 1	185
		Model Solutions to Test Paper – 2	187
		Model Solutions to Test Paper – 3	189
		Model Solutions to Test Paper – 4	191
		Model Solutions to Test Paper – 5	194
		Model Solutions to Test Paper – 6	197
		Answer Key to Practice Problems	198
		Model Solutions to Practice Problems	199
