## SIGNALS AND SYSTEMS

### INDEX

Sr. No.	Contents	Topics	Pg. No.	
<b>1. Linear Time Invariant System</b>				
	Notes	PART(A) :	Continuous Time Signals and System	1
			Classification of signals	1
			Useful signal Operations	4
			Type of Signals	6
			Classification of Systems	14
			Time–Domain Analysis of LTIC Systems	17
			System Stability	29
		PART(B) :	Discrete Time Signals and System	31
			Types of Signals	31
			Useful Signal Operations	37
			Classification of Systems	40
			Time-Domain Analysis of LTID System	41
			System Stability	54
			List of Formulae	57
		Assignment–1	Questions	60
<b>2. Continuous and Discrete Time Fourier Series and Transform</b>				
	Notes	PART(A) :	Continuous Time Fourier Series	64
			Orthogonal Signal Space	65
			Trigonometric Fourier Series	66
			Existence of The Fourier Series: Dirichlet Conditions	68
			The Effect of Symmetry	70
			Fourier Synthesis of Discontinuous Functions: The Gibbs Phenomenon	70
			Exponential Fourier Series	71
			Parseval's Theorem	73
			Continuous Time Fourier Transform	74

Sr. No.	Contents	Topics	Pg. No.
		Properties of Fourier Transform (FT)	75
		Signal Transmission Through LTIC Systems	86
		Raleigh Energy Theorem	86
		Duality	87
		Phase and Group Delay	88
		<b>PART(B) :</b> Discrete-Time Fourier Series (DTFS)	89
		Discrete Time Fourier Transform (DTFT)	90
		Nature of Fourier Spectra	91
		Properties of DTFT	93
		LMR (Last Minute Revision )	94
	Assignment–2	Questions	96
<b>3. Definition and Properties of Laplace Transform</b>			
	Notes	Introduction	99
		The Unilateral Laplace Transform	101
		Properties of Laplace Transform	102
		Laplace Transform of Some Elementary Functions	107
		Finding Inverse Laplace Transform	109
		Solution of Differential and Integro-Differential Equation	111
		Analysis of LTIC System Using Laplace Transform	112
		Bilateral Laplace Transform (BLT)	113
		System Realization	117
		LMR (Last Minute Revision)	120
	Assignment–3	Questions	122
<b>4. Z–Transform</b>			
	Notes	The Z-Transform	125
		The Unilateral Z-Transform	127
		Properties of Z-Transform	127
		Important Theorems	130
		Z-Transform of Some Useful Signals	131
		Inverse Z–Transform	131
		Solving Linear Difference Equation Using Z-Transform	133
		Analysis of LTID System	136
		Connection Between the Laplace and the Z-Transform	136
		The Bilateral Z-Transform	137
		System Realization	139
		LMR (Last Minute Revision)	140

Sr. No.	Contents	Topics	Pg. No.
	Assignment–4	Questions	142
<b>5. Sampling</b>			
	Notes	Introduction to Sampling	144
		Effects of Sampling	145
		Sampling Theorem	147
		Sampling Theorem for Low Pass Signals	147
		Signal Reconstruction : The Interpolation Formula	148
		Sampling Theorem for Band Pass Signals	149
		Frequency Relationship	150
		The Discrete Fourier Transform (DFT)	150
		Fast Fourier Transform (FFT)	157
	LMR (Last Minute Revision)	160	
	Assignment–5	Questions	161
<b>Test Paper–1</b>		Questions	164
<b>Test Paper–2</b>		Questions	169
<b>Practice Problems</b>		Questions	174
<b>SOLUTIONS</b>			
<b>Assignment</b>	Answer Key		184
	Model Solutions		185
<b>Test Papers</b>	Answer Key		203
	Model Solutions		204
<b>Practice Problems</b>	Answer Key		211
	Model Solutions		212
